DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claims 1-3, 10, 12-14, 16-19, 21 and 22 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by U.S. Patent Application Publication 2002/0104524 issued to Reible. Reible discloses a paintball gun comprising: a source of compressed gas 103, a firing chamber [0070]; a removable back plug 210; a paintball loading hole (Fig. 11); a selectively openable gas path between the firing chamber and source of compressed gas (Fig. 11); a door 203 located adjacent the hole; a trigger 805; charge chamber 307; and, an activator (Fig. 6A).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 23-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reible. Reible discloses a paintball gun as described above, including a feed tube (Fig. 11). But, Reibel does not disclose a door adjacent said loading hole and restricted to a sliding motion in a direction non-parallel with a central axis of the firing chamber. However, at the time of the invention one of ordinary skill in the art would have considered such a feature a mere obvious engineering design choice since a laterally closing door is not patentably distinct from a door closing in a parallel direction.

Allowable Subject Matter

5. Claims 4-9, 11, 15, 20 and 26-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents listed on form PTO-892 are cited as of interest to show similar paint ball guns.
